## EDUCATION

---

### California Polytechnic State University, San Luis Obispo

*B.S. Computer Science, Data Engineering Concentration | Expected Graduation: Spring 2028*

GPA: 3.5 | Transferred from Irvine Valley College, Fall 2026

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming (Java/C++), Discrete Structures, Linear Algebra

## TECHNICAL SKILLS

---

**Languages:** C++, Python, Java, SQL, JavaScript

**Tools:** Qt6, CMake, Git, Docker, SQLite, Linux

**Concepts:** Debugging & Root Cause Analysis, Data Structures & Algorithms, Agile/Scrum

## TECHNICAL PROJECTS

---

### MLB Stadium Planner | C++, Qt6, SQLite, CMake

*Six Person Team Project | 2026*

- Built a cross platform desktop application in C++ with a six person team, implementing four graph algorithms (Dijkstra's, A\*, BFS, DFS) for stadium to stadium route search.
- Contributed to Git branch merging and repository reorganization, moving source into a feature based structure and fixing build configuration to keep the shared codebase maintainable as the project scaled.
- Took initiative to trace and fix a data normalization bug causing disconnected graph nodes across two databases, then documented the root cause for the team.

### Credit Risk MLOps Pipeline | Python, XGBoost, scikit-learn, FastAPI, Docker

*Independent Project | 2025 - 2026*

- Built an end to end machine learning pipeline solo, adding Pydantic based input validation and drift monitoring to catch bad or shifted input before it reached the model.
- Diagnosed class imbalance in the training data and applied XGBoost's scale\_pos\_weight alongside a GridSearchCV hyperparameter sweep, nearly doubling recall on high risk applicants from 36% to 58%.
- Containerized the pipeline with Docker and deployed it as a FastAPI web service.

### SOG Field Reports | React, Vite, Supabase, PostgreSQL

*Codebase Student Organization | Client: Structural Observation Group Inc. | 2025*

- Selected for a competitive project team to build production software digitizing field inspection reports for a real construction special inspections client.
- Built multiple jurisdiction specific digital inspection forms, including LA County Building & Safety, Registered Deputy Inspector, and Special Inspection forms, plus a reusable data sheets section for the BFI investigation report.
- Implemented canvas based e-signature capture for digitally signing submitted reports.

## EXPERIENCE

---

### AVID & Engineering Tutor | California College Corps Fellow, Irvine Valley College

*Aug 2024 - May 2025*

- Served as a California College Corps Fellow, completing 450+ hours of tutoring across three Irvine Unified School District sites over the academic year, assisting an Engineering class as a teaching aide at University High School, tutoring AVID students and other subjects as needed at Rancho San Joaquin Middle School, and serving as an AVID tutor at Vista Verde K-8.
- Awarded the Segal AmeriCorps National Service Award for 450+ hours of service.
